Incident Trends & Organizational Threats

2016 Incidents by Industry

2016 Incidents by Cause All Industries

OCR STATS FROM NIST /OCR 2017 CONFERENCE

September 2009 through July 31, 2017

- Approximately 2,017 reports involving a breach of PHI affecting 500 or more individuals
- Theft and Loss are 48% of large breaches
- Hacking/IT now account for 17% of incidents
- Laptops and other portable storage devices account for 26% of large breaches
- Paper records are 21% of large breaches
- Individuals affected are approximately 174,974,489
- Approximately 293,288 reports of breaches of PHI affecting fewer than 500 individuals

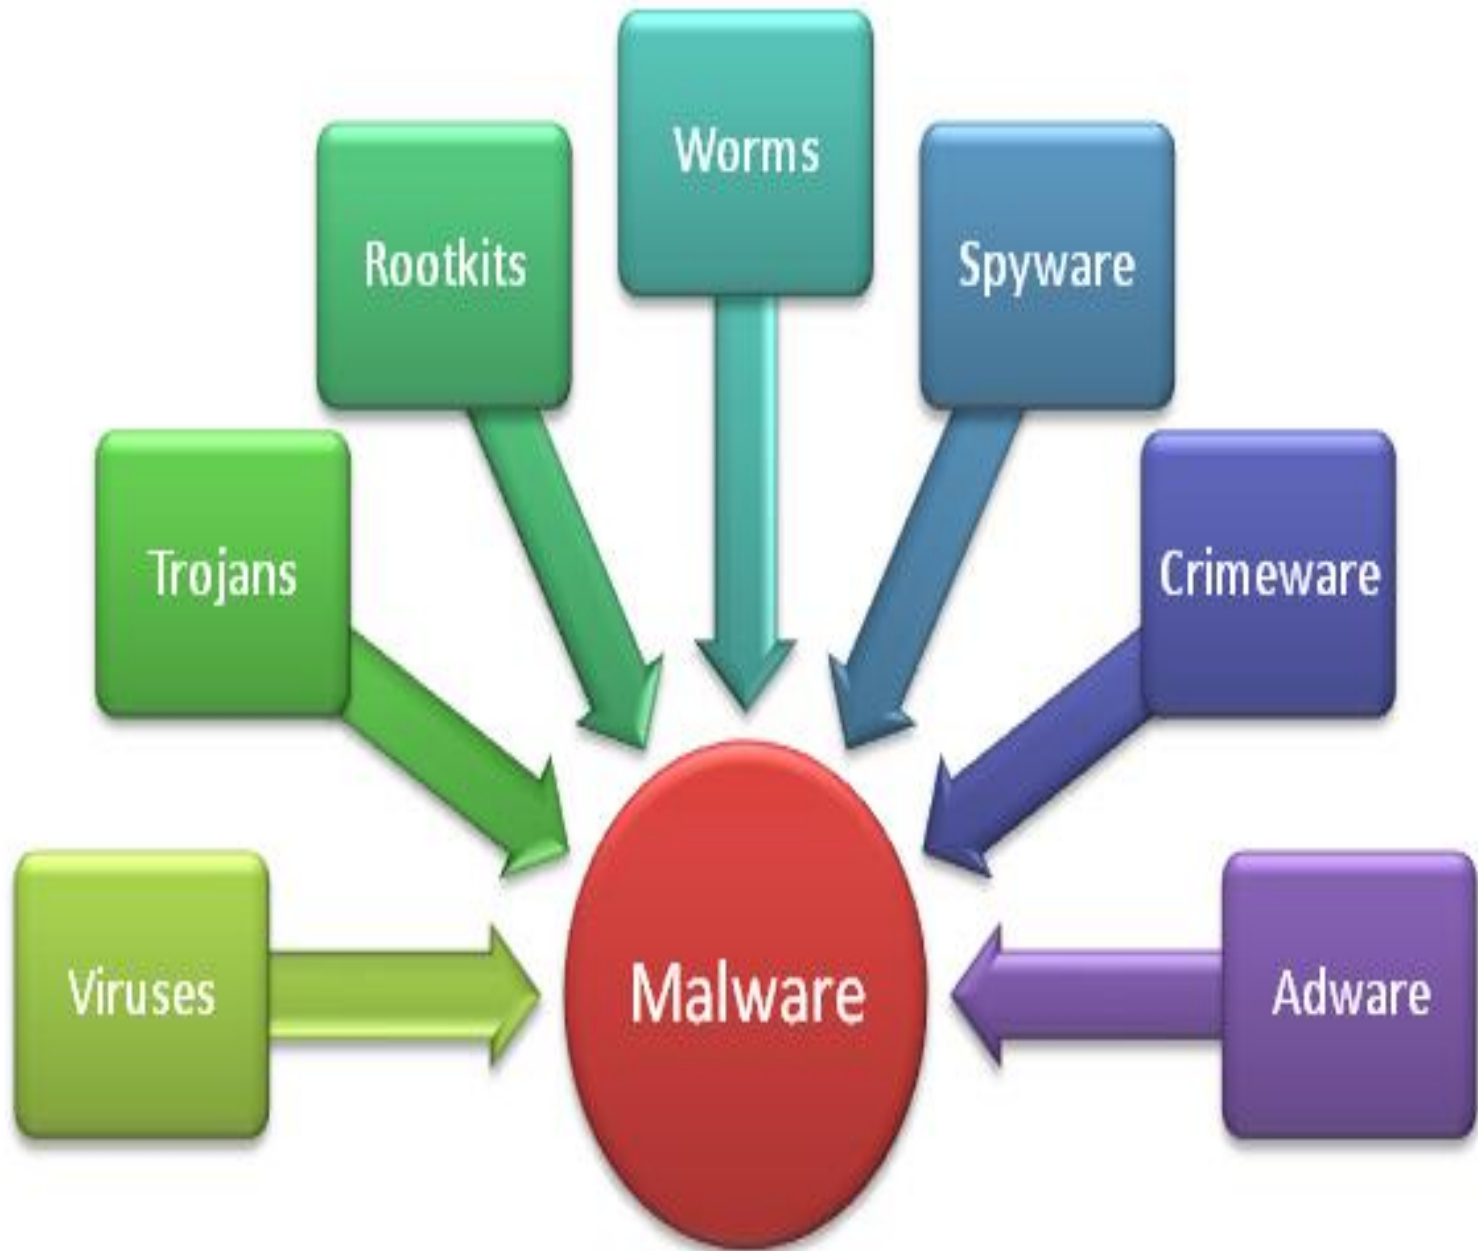

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES
OFFICE FOR CIVIL RIGHTS

OCR Stats . . .

- **Complaints Received and Cases Resolved**

- Over 158,293 complaints received to date
- Over 25,312 cases resolved with corrective action and/or technical assistance
- Expect to receive 17,000 complaints this year

Cyber Attacks Are Often Triggered By Scam Emails

These Range From the More Obvious . . .

- In the past, attacks were much easier to spot.
- One example was the “Arabian Prince” type emails that were full of misspelled words. Fraud was not subtle . . .

From: Armondo Travlio (atavaliow!@#7%@gmail.it)

To: Bob Servant

Subject: Delete This At Your Peril

FROM HIS ROYAL HIGHNEST, PRINCE TAVLIO

Dear Sir,

Permite me to inform you of my desire of going into business. I am Armondo, only son of late King Arawil of tribal land. My father was a very wealthy traditional ruler, poisoned by his rivals. Before his death here in Togol he told me of a trunke containing \$75m kept in a security company. I now seek a foreign partner were I will transfer the proceads for investment as you advize. I am willing to offer 20% of the sum as a compensation for your effort/input and 5% for any expenses. If you are willing to help, transfer \$1000 to Bank of Tribal Account Number: 3486022200 Routing Number: 12647774 as a show of good faith.

Thanks and God bless,
PRINCE TAVLIO

Today Scams Are Much More Sophisticated:

Emails that appear to be from legitimate companies that you do business with and are designed to entice users to click on links or open attachments.

FedEx Service <details@feedeex.com>

We value and appreciate your business!

*Mobile Broadband coverage not available in all areas.

** Based on U.S. carriers.

Attention New Jersey customers and small businesses: FREE e-cycling for electronic devices with video screens more than 4 inches at nearby collection sites. <http://www.nj.gov/depldshwiewastelcollectionsites.pdf> or 1-800-DEPKNOW

This is a system-generated message from a send only address. Please do not reply to this email.

BAKER DONELSON

Source: DynaSis

But Look Closely Before Clicking . . .

- Check the sender email address closely before you click. Don't assume an email is legitimate just because the logo looks correct.
- Use common sense. Using the example, if it would be odd for you to get an email about a FedEx delivery failure, that is a red flag.
- Sometimes, you can hover the cursor over the link to see the web address of the link. A FedEx "print shipping label" link should not be to random.net/hotdeal

Many Attacks Prey On Your Work Ethic And Fears like the “Alert” Pop-up

- Alerts claiming your computer is frozen or data is being stolen, commanding you to call a number or click on a link are scams.
- Shut down your computer or call your IT Department, if you are concerned. Do not click on anything. Do not call the number in the pop-up or share information.

Scam Requests for Payment

Some scams may look like an invoice. Use common sense. References to wire transfer or payment by the same day are red flags. Think before you click.

Dell Inc
5 Polaris Way,
Aliso Viejo, CA 92656,
Tel +1 949 754 8000
Fax +1 949 754 8999
WWW.Dell.com

Customer Name: Wilkins Academy
Account #: 1248447

Dear Customer,
Please be advised, the below overview of invoices is showing as unpaid on your customer account with Dell Software International Limited.

We would like to bring to your attention, we expect your payment to reflect on our account latest by due date, transferred to the respective bank details stated on invoice. In case of payment delays beyond contractual agreements, Dell Software Group is authorized to take further action to ensure timely payment.

Transaction #	Trans Date	Purchase Order	Due Date	Currency	Balance Due
1000223085	28. 10. 2014	1-SQH9HT	31. 1. 2015	USD	\$1410.10

Please note that if you are paying by bacs, wire or chaps transfer to Dell software group please ensure that you have the below bank details correct in your system.

Bank name : JPMorgan Chase Bank, N.A. (NY),Account Number: 365839887, Swift Code: CHASUS33XXX,Currency : USD

Kindly include your Dell account number, company name and all invoice numbers when you make the payment so that we can apply the payment into the invoices immediately once we receive the payment. If you have paid any of these amounts, please exclude those from your payment order. Thank you once again for your continued business with Dell.

Sincerely,

Johnathan Griffin
Dell Collections
Email: jgriffin@software.dell.com

BAKER DONELSON

Scam Requests for Payment

The example below includes both a potentially dangerous link and a demand for payment.

Common sense and awareness:

- You should know if you've gotten a parking ticket. A legitimate email would include contact information for questions.
- The sender's email address does not look like an official email address.
- A legitimate email would not be signed "Police Department."

From: Traffic Police Department <gbpftif@ad.maxart.it>

Date: April 19, 2017 at 6:19:01 PM CDT

To: Joe Stewart <jstewart@firm.com>

Subject: Parking Ticket #9856125332

You got a parking fine!

26-143 – Unattended car

Required to appear in trial

Parking ticket number PTD9856125332

[Check Parking Ticket](#)

To pay your parking fine, download your ticket and choose one of 2 convenient ways:

1. Online – Pay online by Visa or Mastercard, \$2 processing fee.
2. By phone (automated system) - Pay by Visa or Mastercard at 866-562-4828

Best Wishes,

Police Department.

Scam Requests for Payment

- This email appears to be from a familiar company executive. The executive claims to be unable to talk with you in person but needs you to wire or send funds immediately.
- The sender's email address is a red flag.
- BUT NOTE: A hacker may have ghosted the executive's account such that the email address looks accurate. NEVER send or wire funds without face-to-face confirmation or without otherwise following our procedures.

From: Brenda Director <brendaceo@gmail.com>

Date: April 2, 2017 at 2:12:01 PM EDT

To: John Employee <jemployee@firm.com>

Subject: AT&T Payment – URGENT

Hi,

I'm out of the office in a meeting with John Smith. The payment to AT&T is overdue. This needs to go out now by wire transfer to avoid interruption of service.

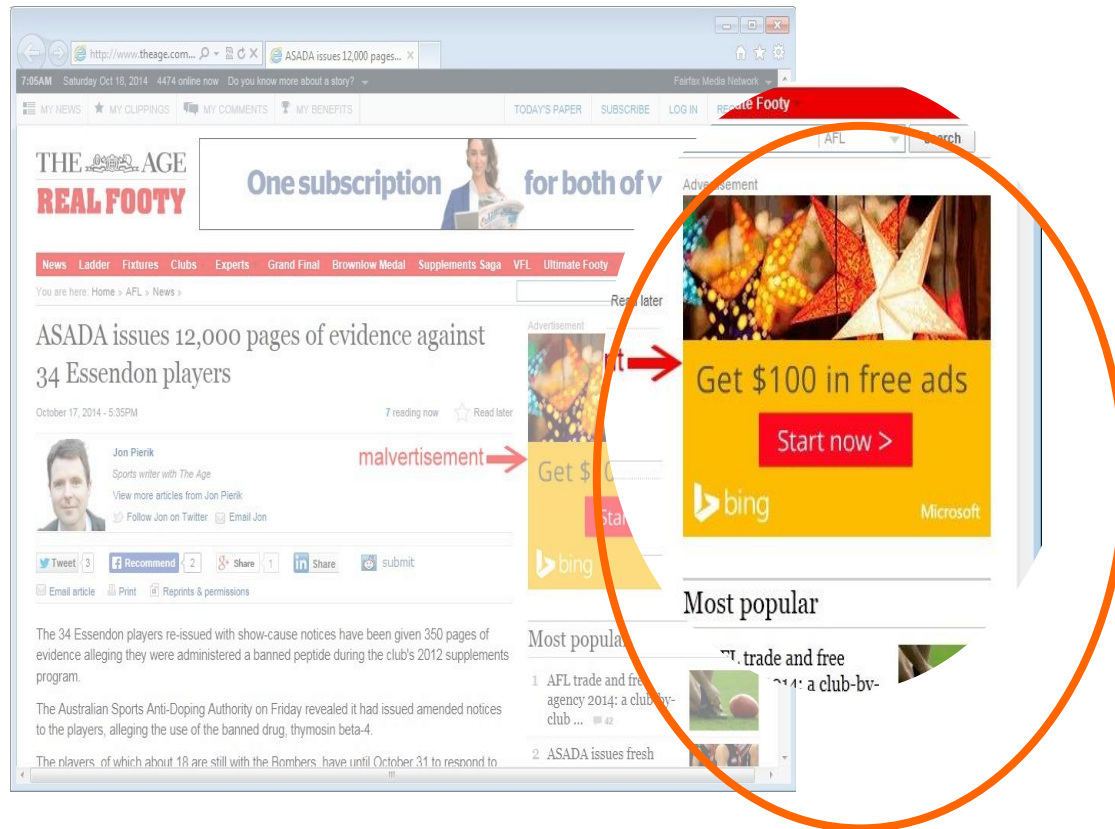

Please immediately wire \$5,348.45 to South State Bank, Routing # 351578040, Account # 5831365839887. Let me know when complete. It can't wait.

Regards,
Brenda
CEO

BAKER DONELSON

Scam “Malvertising”

Links for “free” services, downloads, or streaming video are also suspicious. The cliché holds: If it sounds too good to be true, it probably is. It could be a link to malware or something that will harm our network.

Scams That Make You Feel You are Missing Out If You Don't Click on the Link!

- Emails that appear to be from a friend linking to pictures or a vendor linking to an invoice or deliverable.
- Be alert: Are you expecting pictures from that friend? Does the sender email make sense or look familiar?
- Hover your cursor over the link. Does the website information fit?
- Unless you are 100% certain, do not click on the link.

Ransomware: One Wrong Click Can Lead To An Attack

Ransomware launches an attack that lets the hacker hold our computers and network HOSTAGE until we pay a monetary ransom. **If you ever see a screen like the one below or on the following slide, shut down your computer and call the IT Department immediately.**

BAKER DONELSON

Ransomware Attacks Come In All Shapes And Sizes And Can Be Very Sophisticated.

Ransomware can launch from one click on a link or email attachment.

Incident Trends & Organizational Threats

Increasingly Common: Dropper

 TACTIC

Malware that
installs other
malware

1

Bad actor
gets a
piece of
malware on
computer

2

Malware
sits quietly
and just
phones
home; not
the old
fashion
flashy/noisy
malware of
yesterday

3

Bad actor sells
or
rents ability to
infect
computer

- Malware
phones home
- Installs main
payload:
Ransomware,
etc.

4

If contract
ends or
need more
capacity,
just install
more
Malware

Preventing An Attack Takes Layers of Protection and Prevention

Security Risk Analysis & Management

"[a] flaw or weakness in system security procedures, design, implementation, or internal controls that could be exercised (accidentally triggered or intentionally exploited) and result in a security breach or a violation of the system's security policy."

Vulnerabilities can be technical or non-technical.

"[t]he potential for a person or thing to exercise (accidentally trigger or intentionally exploit) a specific vulnerability."

Threats can be natural, human, or environmental.

"the net mission impact considering (1) the probability that a particular [threat] will exercise (accidentally trigger or intentionally exploit) a particular [vulnerability] and (2) the resulting impact if this should occur."

A Vulnerability triggered or exploited by a Threat equals a Risk.

Security Risk Assessment

What is Risk Assessment?

The Health Insurance Portability and Accountability Act (HIPAA) Security Rule requires that **covered entities** conduct a risk assessment of their healthcare organization. A risk assessment helps your organization ensure it is compliant with HIPAA's **administrative, physical, and technical safeguards**. A risk assessment also helps reveal areas where your organization's protected health information (PHI) could be at risk. Watch the **Security Risk Analysis video** to learn more about the assessment process and how it benefits your organization or visit the **Office for Civil Rights' official guidance**.

Your Mobile Device and Health Information Privacy and Security

 Physicians, health care providers and other health care professionals are using smartphones, laptops and tablets in their work. The U.S. Department of Health and Human Services has gathered these tips and information to help you protect and secure health information patients entrust to you when using mobile devices.

Worried About Using a Mobile Health Device?

MOBILE DEVICE RISKS

- 1) Lost mobile device
- 2) Stolen mobile device
- 3) Downloaded virus
- 4) Shared mobile device
- 5) Unsecured Wi-Fi network

Read and Learn
