

Therapy Management group based in Florida volunteers at Healthy Sumter Community Garden at Brookdale Park

Americus, GA (April 14, 2021) -- Today we had the pleasure of hosting Therapy Management Corporation at the Healthy Sumter Community Garden at Brookdale Park. Based in Florida but with branches throughout the United States, TMC is a therapy provider for physical, occupational and speech therapists in several different settings. As part of giving back, they have a volunteer arm called Together Making Changes that takes part in a wide range of volunteer events and fundraisers throughout the year. They were looking for volunteer opportunities, and when they heard about our garden they decided to come and do some work in the garden.

Led by Mayor Pro Tem Nelson Brown, the group of 18 volunteers not only worked in the garden but they also passed out flyers in the nearby neighborhoods, alerting community members of the upcoming Planting Day this Sunday, April 18 at 2 pm. Sumter County Sheriff Eric Bryant and a number of other law enforcement officials were on hand to greet the group and accompany them during their distribution of flyers.

Upon finishing, the group thanked everyone and said that this was one of the best projects they had ever been a part of, and they felt like rock stars with all the dignitaries that greeted them.

Progress continues!
